DETAILED ACTION

1. Receipt is acknowledged of the amendment filed 6/25/02.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-6 and 13-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schneider, US Patent No. 6,089,976, cited by the applicant, in view of Glasson, US Patent No. 6,290,600.

Schneider teaches a gaming device 10 comprising a controller 60, a plurality of adjacent video reels 40, and video monitor 14 for displaying the reels (see figure 1 and col. 4, line 64 to col. 5, line 15). The reels display non-interacting symbols C. A game player uses credit meter 42 to display a credit value on the video monitor. During a bonus game, the monitor may be used as

a touch screen (col. 5, lines 56-600 and the player will be visually or audibly prompt to select a symbol on the screen.

Schneider fails to teach or suggest two or more adjacent and non-adjacent symbols on the reels as triggered to interact with one another.

Glasson teaches an electronic game, whereas display 10 shows a plurality of reels 12 containing symbols. During play, when a bonus condition is sensed by the processor, a sequence is triggered in which a symbol 18 may jump across the reels of the display and interact with another symbol adjacent 20 or not adjacent to it 22 (see figures 7-12 and col. 5, lines 36-60).

In view of Glasson's teaching, it would have been obvious to one ordinary skill in the art at the time the invention was made to modify the system of Schneider to include two or more adjacent and non-adjacent symbols on the reels to enhance playability. Such modification would provide greater interaction with the game device and would excite the game player by providing more enjoyment. Therefore, it would have been an obvious extension as taught by Schneider.

Response to Arguments

5. Applicant's arguments filed 6/25/02 have been fully considered but they are not persuasive. (see remarks).

REMARKS:

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

In response to the applicant's arguments regarding some of the functional and method steps, such as a plurality of reel having at least two player selectable interacting symbols thereon, the examiner respectfully disagrees. This type of specific configuration fall within the engineering design choice, failing to provide any unexpected results, which therefore, obvious. With respect to the argument that combination of the prior art would destroy one another, the examiner respectfully disagrees. The examiner suggested modification was not to blindly combine the reference, contrary, an artisan would be motivated to employ the teachings of Glasson to selectively modify the teachings of Schneider. The applicant arguments are not persuasive. Refer to the rejection above.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
